

Phase-1 Project Evaluation

Purpose.

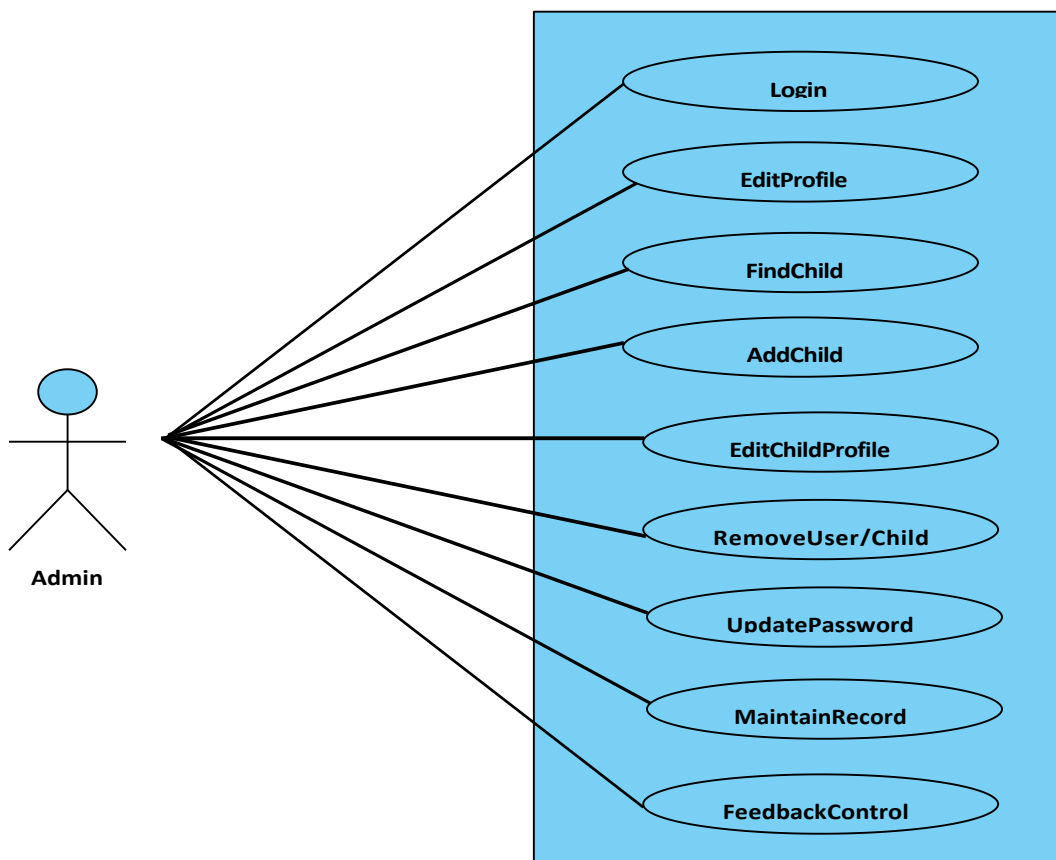

Earlier considered a taboo in India, adoption is now considered and spoken about freely in Indian society. The problem of orphan/ street children is acute due to urbanization and industrialization. Due to the Deaths of parents, Poor Economic conditions of the family, and several other reasons, these orphan & street children are left without care and support. To solve this problems we are proposing to -“E-ADOPTION SYSTEM” with following objectives:

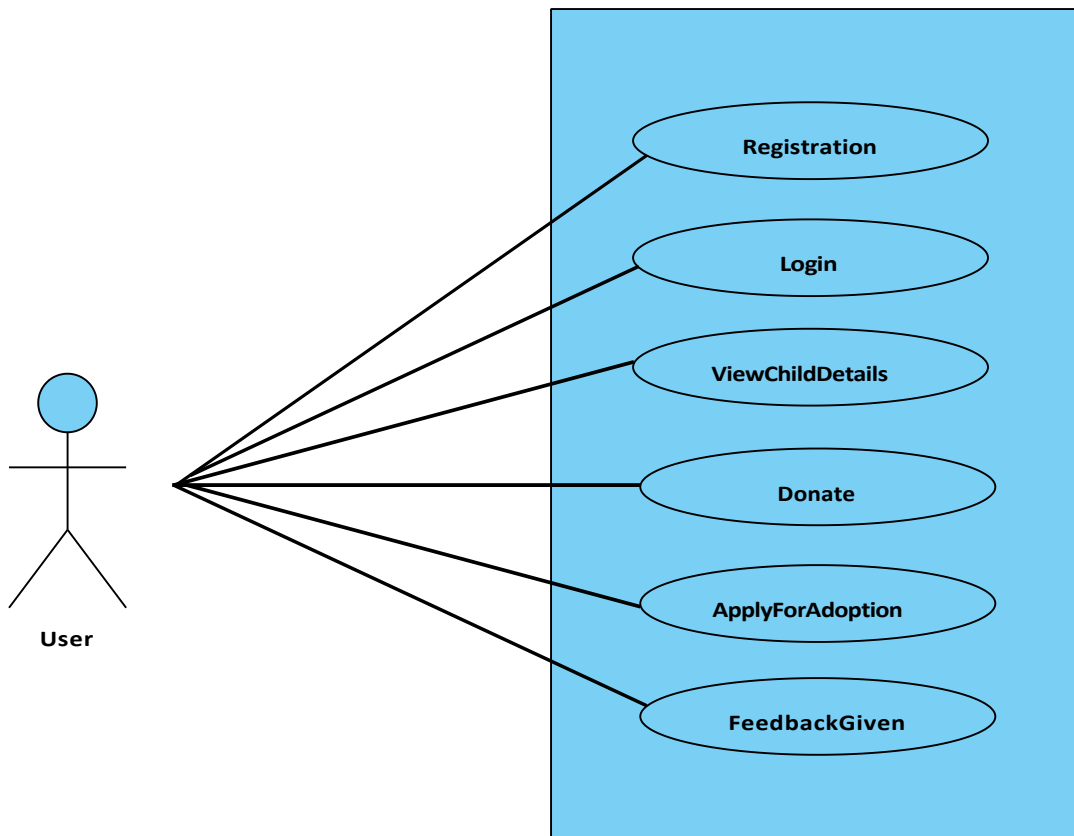

1. To create a portal for online adoption of child.
2. Verify and validate details of applicants.
3. To provide an easy adoption process with adoption form for applicants.
4. Ensuring that child details do not lead to any discrimination.

Scope

This project is to provide online help to the orphanage so that they could help the orphan children and people who want to adopt children. In our project, have given details of children in the orphanage. People who want to adopt any child can contact online and the admin will confirm the time of visit to the orphanage house to see the child or they can see the child's information on the website after registration. If they want to adopt a child so they can apply for an adoption form with the required documents This orphanage home aims to provide care, support, and protection for orphans.

Work Flow:

Database-Design:

1. Adoption_Form Table

Form_no (Int)	User_Id (Int)	Adoption_Reason (String)	Marritial_Status (String)	Spouse_Name (String)	Occupation (String)	Annual_Income (Int)	Address (String)	Aadhaar No (Int)	Pan No. (Int)

2. User Table

Sr.No (Int)	User_Id (Int)	User_Name (String)	User_emailId (String)	User_Contact (String)	User_Password (String)

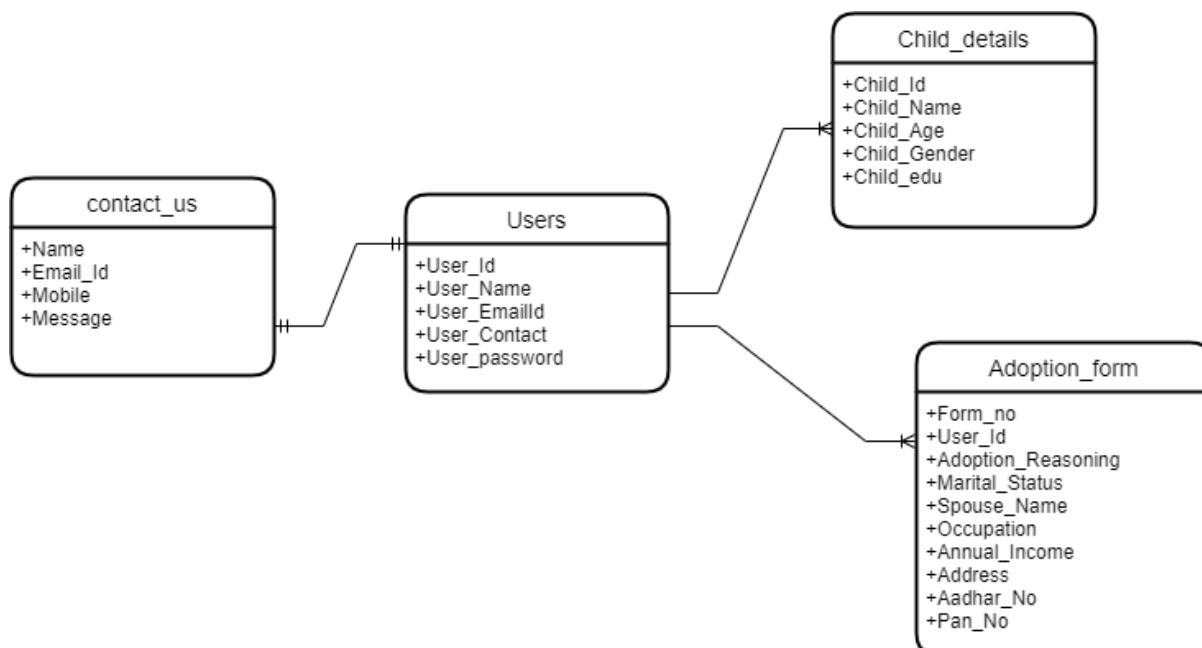

3. Contact Us Table

Sr.No (Int)	Name (String)	Email Id (String)	Mobile (Int)	Message (String)

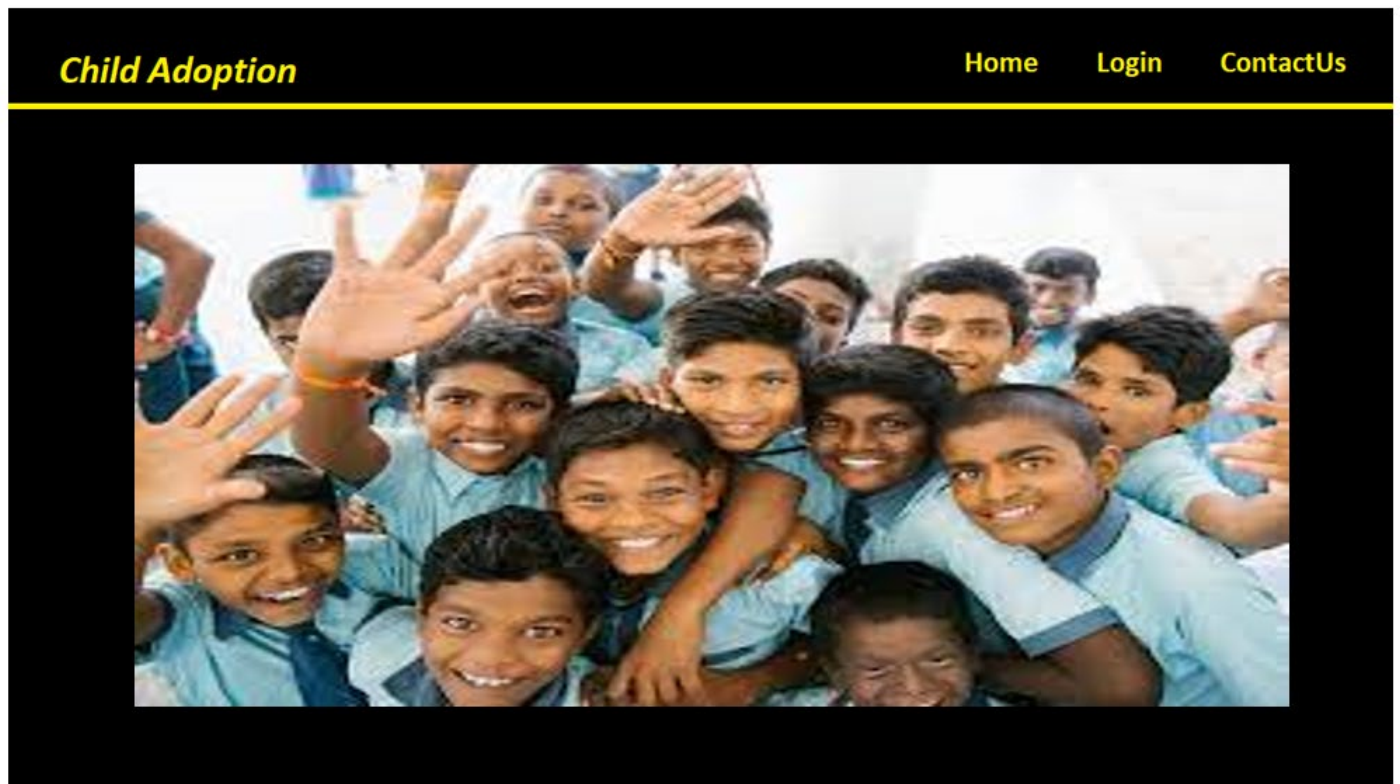

4. Child details Table

Sr.No (Int)	Child Id (Int)	Child_Name (String)	Child_Age (Int)	Child_gender (String)	Child_Edu. (String)
